Subject: 1 Day Left! Download Our App to Access Your Schedule for the CLA & RISE Regulatory Conference!

Michael Goodis,

Your personal schedule for the CropLife America & RISE Regulatory Conference is available in our conference app! Download the app now to see which sessions you've signed up for, or make any changes!

Specific features are available **only to registered attendees!** Be sure to log in ahead of time so that you can:

- See a list of attendees
- Message or schedule one-on-one appointments with fellow attendees
- Add contact info to your profile or upload a photo

In addition, you can:

- Read speaker bios
- Check out exhibitors and sponsors
- View a map of the conference floor
- Look up your session schedule

Step 1: Download the App!

The first thing you'll need to do is download the app on the device you're bringing to the event.

Don't have iOS or Android? Skip Step 1 and go straight to Step 2 to verify your account and use the mobile web version of the app.

Download the App

Step 2: Verify Your Account

Then, come back to this email using the same device from Step 1 and click **Verify Account** to unlock all of the app's advanced features.

Verify Account

Contact Whitney Gray at wgray@pestfacts.org if you have any questions.

Enjoy the event!

Subject: RE: Ombudsperson for RD? - are you available to meet with the CLA Registration Committee on May 22?

Rachel – thanks for the information. We (CLA) would still like to invite you to our next CLA meeting (next week) to better understand your role as training coordinator.

In explanation, Dan Rosenblatt mentioned you are the RD training coordinator for the Division. If you are available on Tuesday, May 22 either in person (preferred) or via phone we would like to better understand this role.

Specifically we would like to know more on the following areas:

- Can you provide an overview of the staff training activities
- How did this role come about?
- Is there anything CLA can do to help?
- Are there areas you would recommend training the registrants (what areas do we need training on)
- Are there others involved at EPA? Do you have a committee involved in the training? Are there specific areas for each committee member?

Thanks Rachel!

Freundliche Grüße / Best regards,

Karen Cain
Sr Regulatory Manager

Hi Karen,

I am not the Ombudsman for RD. I have copied Dan Rosenblatt, Deputy Division Director, to ensure that the appropriate RD representative is available to you.

Subject: Ombudsperson for RD? - are you available to meet with the CLA Registration Committee on May 22?

Rachel – are you still the current Ombudsperson for OPP Registration Division? If you are the current Ombudsperson, as Chair of the CLA Registration Committee, I would like to invite you to our next meeting next Tuesday (May 22) for a discussion w/ CLA member company registration experts (we would provide our questions in advance). We meet from 9:00 – 3:00 in the CLA offices at 1156 15th St NW, Suite 400 (down from the McPherson Square metro stop) and could accommodate your schedule anytime during that period.

Thanks!

Freundliche Grüße / Best regards,

Karen Cain

Subject: RISE EPA Labels Live and Label Workshop Invitation

Hi Mike,

I hope all is well in your office. I wanted to catch up with you about the Registration Division's participation in the CropLife America/RISE Regulatory Conference this April. As I'm sure you know, we've been in touch with the main OPP office to discuss this year's agenda, but I wanted to reach out to you personally to encourage you and your staff to participate in two unique events: our third annual *EPA Labels Live!* event, as well as our new Label Workshop.

The *EPA Labels Live!* event will take place April 26 from 1:15-2:45 p.m. across the street at the Renaissance, the same location as last year. We very much appreciated your team's attendance at last year's event, and we believe this year's event will provide a similar valuable training opportunity for RD staff. This year's event will feature new content on product formulation varieties, registrant label workflows, business reasons for supplemental distribution, stewardship in consumer product packaging, and specialty use sites. The session is open to all EPA staff, and no RSVP is needed to attend. We do, however, appreciate your staff's arrival by the start time of the session when possible to help with the flow of the event.

We are also working with Rachel Holloman to prepare for the Label Workshop taking place April 26 from 3:00-4:30 p.m. at the Renaissance. We hope the workshop can provide an opportunity for two-way dialogue between our members and your staff and begin a process for seeking solutions to some of our common label challenges. I am working with our workshop facilitators and members to create a conversation that is candid, positive, and productive for registrants and the EPA team. Our goal is a workshop to enhance mutual understanding and to act as a springboard for ongoing conversations to address our issues and challenges together. As a result, we want to encourage EPA participants to make comments and fully engage during the workshop. We have enjoyed working with Rachel and look forward to working with her to finalize your staff's participation.

We understand your staff's attendance at *EPA Labels Live!* and the Label Workshop will require a time commitment, and we greatly appreciate your support of these unique opportunities to share information and increase understanding. We hope you can encourage as many RD staff, of all experience levels, as possible to attend these events. I have included PDF flyers for each event that you can pass along to your staff so they have information about attendance.

Thanks again for your support of these initiatives, and please contact me if there's anything I can do to facilitate your staff's attendance at these events.

Subject: Invitation to meet with CLA's Registration Committee

Hi Yu-Ting,

As vice chair of the CropLife America Registration Committee I would like to invite you to meet with us at our upcoming September 18th meeting. If you are available, I will provide you in advance a list of questions presented by our members. Our committee last visited with you a year ago so we are interested in updates on several topics. We meet from 9:00 – 3:00 and we would accommodate your schedule – we anticipate 1 hour discussion.

Please let me know if you would be available to meet with our Registration Committee on the 18th, and if so, what time is convenient for you.

Thank you for your consideration.

Best regards,

Bob Hamilton

Subject: CLA Pollinator Work Group - invitation

Importance: High

Mike, Marietta, Yu-Ting:

Our Pollinator Work Group meets on Thursday this week, 9 a.m. to 3 p.m. We would like to invite you folks to visit with us for an hour or so to catch up on a variety of pollinator related topics. I apologize for the late invitation, but it would be great if even one of you could come. Potential topics of interest:

- Status of acute tox mitigation policy.
- Implementation of updated bee data requirements during registration review, prioritization of active ingredients.
- Reaction to EFSA neonics risk assessment.
- CLA Regulatory Conference in late April.

Hi Ray,

Thank you for the invitation to participate in the Pollinator Work Group meeting this Thursday. Given the short notice and the challenges with our schedules, we are only able to participate by phone this time. Meredith Laws (RD), Yu-Ting and I are available to cover the topics below from 2:00 – 2:30 pm tomorrow. Please let us know if this works and if so send a call-in number.

Regards,
Marietta

I filed the attached request to extend the comments deadline for the neonic risk assessments in the chlothiniidin docket. Does it need to be filed in the other dockets as well. Regulations.gov shows me I am commenting on the FR notice that announced the comment period for all of the active ingredients and risk assessments.

Subject: RE: Metam/MITC Task Forces -- DER Review

Hi Lisa

Apologies for not getting back to you sooner as I was on an international work travel since mid September. Thank you for sharing the 2015 CLA letter. I am writing to follow up on the issues you raised on the 8/14 call regarding the applicability of FIFRA §10(g) to the registration review Data Evaluation Records (DERs) and a request for the Agency to share registration review DERs prior to public release.

On the call and in referencing the 2015 CLA letter, you asked about the applicability of FIFRA §10(g) to DERs. As you are aware, OPP evaluates scientific data submitted by pesticide registrants in support of pesticide registration to assess potential human health and environmental effects. These data are conducted with active ingredients, inert ingredients, and product formulations in accordance with EPA guidelines. The data generally fall under the subject areas of toxicology, environmental fate and groundwater, ecological effects, residue chemistry, product chemistry, and efficacy. The release of these FIFRA studies (i.e., the original studies) is restricted under FIFRA §10(g). Section 10(g) of FIFRA applies when individuals seek access to the data submitted to the Agency by pesticide registrants and it requires all requesters to complete the Affirmation of Non-Multinational Status. Section 10(g) also requires the Agency to notify the data owner to whom the Agency is releasing the data.

As you are aware, DERs are the records of the Agency's review of the FIFRA studies. Prior to making the information publicly available in the Chemical Search Database, all DERs are reviewed to ensure both Confidential Business Information and any potential FIFRA §10(g) conflicts are removed. EPA has extensive experience with such reviews. I hope this addresses your question on the applicability of FIFRA §10(g).

Regarding the request for PRD to consider sharing registration review DERs prior to public release, in an earlier email, you had provided a form letter for EPA's consideration. On the call, we discussed the transparency and feasibility issues associated with the form letter approach. To respond to your request, I would like to propose that the registration review Chemical Review Managers share the DERs with the registrants at least one week prior to publication. If any potential errors were identified in the DERs, registrants may continue to directly contact the appropriate chemical review manager with any corrections and/or submit the recommended corrections during the public comment period of the associated draft risk assessments. I believe the proposed approach addresses your request as well as the Program's concerns with transparency and resources.

I appreciate your reaching out to us on these issues and hope this email addresses your questions. Please let me know if you have any follow up questions or thoughts. Thank you.

Subject: Meeting Request: 2019 CLA Board of Directors Visit with EPA

Good morning, Rick,

We are making plans for our Winter Board of Directors Meeting in March 2019, and as is tradition, we would like to make arrangements for our Board to visit with EPA staff, to discuss current and emerging topics of the day (attached is the agenda from last year's meeting, to give you an idea of the program content). We have set aside some time on our agenda, for Tuesday morning, March 5, 9:30a-11:30a, to meet with you and your staff. In the interest of time and convenience, we could host the meeting at the Renaissance Arlington Capital View (Studio D), which is within walking distance of your offices at Potomac Yard.

Please let me know if you and your staff would be available to meet with the Board.

Thanks for your assistance with this.

Happy New Year!

MJ

Subject: Prep Call with Alexandra Dunn

Hi, Rick,

Beau Greenwood stopped by my office earlier, to ask me to work on setting up a call with you and Alexandra, and our CEO Chris Novak (and Beau), to in advance of her presentation to the Board on March 5. What's the best way to go about this? I'm happy to offer some times that Chris is available next week:

- Tuesday, February 26 – between 10:00a and 11:15a, or after 3:30p
- Wednesday, February 27 – between 10:00a and 11:30a
- Thursday, February 28 – between 11:30a and 1:00p, 2:00p (for 30-45 minutes), or 4:00p or after

I've copied Alexandra's staff person here, in case it's helpful for your offices to coordinate calendars.

I look forward to hearing from you!
MJ

All –

Thank you for agreeing to have a F2F meeting. The discussion will be on CLA Environmental Science Projects.

Logistics for the day of the meeting:

After going through building security, you will need an escort to walk with you upstairs to the meeting room. please call our office main line: 703-305-7090, and Ann McKamey or I will come down to the lobby to escort you to the conference room. As back up in case we both happen to be away from our desks, please call Darlene Dinkins at 703-305-5214 or third, Debby Sisco at 703-308-8121.

Hello Susana,

February 14th works well for the group here. Please let me know if 9, 10, or 11am would be preferable for those on your end and I will send out an invitation.

Thank you,
Shannon

Shannon,

Thank you so much for reaching out. Would Rick possibly be available February 12, 14, 18 or 20? I'm copying my admin, Susana Zloczower, to help us coordinate. Our office is closed next week, but I will be available by email if we need to coordinate further then. I very much appreciate your help with this request.

Best regards,

Rachel

Rachel—

Per my voice mail, Shannon Jewell can work with you to find some time in the new year to discuss the labeling issues you raised in your 12/19/18 voice mail. Given the topic, I think we'd probably want to include Erin Koch and Chris Kaczmarek from OGC and Mike Goodis from RD.

Hi, Rick,

Beau Greenwood stopped by my office earlier, to ask me to work on setting up a call with you and Alexandra, and our CEO Chris Novak (and Beau), to in advance of her presentation to the Board on March 5. What's the best way to go about this? I'm happy to offer some times that Chris is available next week:

- Tuesday, February 26 – between 10:00a and 11:15a, or after 3:30p

- Wednesday, February 27 – between 10:00a and 11:30a
- Thursday, February 28 – between 11:30a and 1:00p, 2:00p (for 30-45 minutes), or 4:00p or after

I've copied Alexandra's staff person here, in case it's helpful for your offices to coordinate calendars.

I look forward to hearing from you!

MJ

Hi Ray,

Just wondering if you have any knowledge as to how Section 18 emergency uses are handled during the government shutdown. Are they reviewed when submitted by the States during a shutdown? These are emergency uses after all, and nobody answers the phone in the Agency's Minor Use and Emergency Response Branch. I was thinking the States could authorize a Crisis Exemption per 40 CFR Part 166, Subpart C but even the language of that regulation requires that "EPA has provided verbal confirmation that, for food uses, a tolerance or exemption from the requirement of a tolerance can be established in a timely manner,..." In addition, the regulations pertaining to Crisis Exemptions require "The State or Federal Agency issuing the crisis exemption must notify the Administrator in advance of utilization of the crisis provisions." Crisis exemptions are limited to a duration of no longer than 15 days.

Just wondering if you have any information/experience on this type of situation as [company] has received a request from [redacted] cooperative extension to support an emergency Section 18 and they are wondering how long it will take for EPA approval. Before I propose they go for a crisis exemption I wanted to check on whether this was even possible during a government shutdown.

Attachments: martyetal oxon paper 2012.pdf

Dear Nancy and Rick- thank you for the time you dedicated to meeting with us on Wednesday morning.

During the meeting, we discussed the EPA consideration of the exposure information from the CHAMACOS study. We discussed that CHAMACOS did not report chlorpyrifos but did report on the oxons of chlorpyrifos. Attached please find a paper published in 2012 wherein you will note the authors statement (see last sentence in abstract) that oxons would not be in the peripheral tissues- thus, would not be present in the brain- brain function would not then be affected by oxons in the blood samples.

We welcome the opportunity to discuss this further, and likely will address that specific point when we provide the final study report that we have conducted to plot the data from the Columbia University study.

Thank you again.

For Immediate Release

January 31, 2018

CropLife America and RISE Support Administration's Steps To Improve Federal Protection Of Threatened And Endangered Species

WASHINGTON, D.C. – CropLife America (CLA) and RISE (Responsible Industry for a Sound Environment®) applaud the administration's efforts to improve federal protection of endangered and threatened species and their habitats.

Today, the Trump Administration announced the establishment of an interagency working group to coordinate Endangered Species Act (ESA) consultations for pesticide registrations and registration review in a Memorandum of Agreement (MOA) between the Environmental Protection Agency (EPA), the Department of the Interior (DOI), which includes the Fish and Wildlife Service (FWS), and the Department of Commerce (DOC), which includes the National Marine Fisheries Service (NMFS) (collectively, "the Services").

The MOA outlines the difficulties with the current consultation process and proposes an Interagency Working Group to support EPA and the Services in meeting their obligations related to the pesticide consultation process. Through the MOA, EPA and the Services will request the U.S. Department of Agriculture, the Council on Environmental Quality (CEQ) and the Office of Management and Budget join the Working Group and that CEQ serves as its chair.

"It's encouraging to see that our work with the environmental and farming communities and the administration has resulted in a positive step towards solving this important and complex issue," said Jay Vroom, CLA president and CEO. "We expect the Working Group's recommendations will not only help to ensure that consultation works between agencies to actually protect species, but will also promote government efficiency and effectiveness." He continued, "CLA looks forward to engaging other stakeholders to ensure that federal protection of the species is more effective and efficient while maintaining the access to safe and effective technologies for farmers."

Aaron Hobbs, RISE president, noted the specialty pesticide industry's enthusiastic support of the MOA. "Public health authorities have also been impacted by the issues this MOA addresses," he said. "Effective control of disease vectors like mosquitos can only happen when a predictable regulatory system for pesticide technology use and protection of the species is working."

The MOA establishes an action plan to guide the working group to analyze relevant statutes, regulations, and case law, review past ESA pesticide consultation practices to learn lessons from recent experiences, prepare recommendations to improve scientific and policy approaches, and document the approach moving forward.

"We look forward to the recommendations made by the Working Group following their work with various stakeholders and the completion of the action plan," added Vroom.

Subject: RE: Global Minor Use Summit and Workshop update - Friday, October 12th at 7 am New York City time.

Just a reminder and a copy of the call in info at the top of your email inbox! Thanks. Dan

Global Minor Use Workshop/Global Project update on Friday October 12th, 2018, 7am New York City Time.

The call in number will be Conference Line/Code / Ex. 6 and the pass code is Conference Line/Code / Ex. 6

AGENDA

GLOBAL MINOR USE SUMMIT:

- Outcomes and update
- The Global Minor Use Fund/Foundation.
- STDF Projects, as they conclude and maybe a new one
- Global Minor Use Survey update.

STDF capacity residue projects update

GMU WORKSHOP #1 and #2 update.

IR-4 2019 Priorities

PMC Canada 2019 Priorities.

List of projects that have received funding under the pesticides access grant scheme in Australia.

<http://www.agriculture.gov.au/ag-farm-food/ag-vet-chemicals/improved-access-agvet-chemicals/agvet-assistance-grants>

Opportunities for 2018/2019 regional meetings.

- CCPR - April 2019
- IUPAC - 2019
- NAFTA Technical Working Group on Pesticides – June 2019
- Etc

Other updates etc.

I hope you can join us.

Please feel free to share information etc with the group or edit/update slides...

Thanks,

Daniel Kunkel, Ph.D.

Subject: HOLD the date - Follow-up to Global Minor Use Workshop - Friday, October 12th am New York City time.

Attachments: GMU workshop Update 10_18.pptx

I hope many of you can join us for a Global Minor Use Workshop/Global Project update on Friday October 12th, 2018, 7am New York City Time.

The call in number will be and the pass code is

As you will see in the attached slides, we have made some progress since our last teleconference. However, we still need champions for several of the new projects!

We can also have updates regarding:

- The Global Minor Use Fund/Foundation.
- STDF Projects, as they conclude and maybe a new one
- Follow-up from the 2017 GMU Summit 3

Opportunities for 2018/2019 regional meetings.

- CCPR
- IUPAC
- NAFTA Technical Working Group on Pesticides
- Etc

Other updates etc.

I hope you can join us.

Please feel free to share information etc with the group or edit/update slides...

Thanks,

Daniel Kunkel, Ph.D.

Subject: RE: Global Minor Use Summit and Workshop update - Friday, October 12th am New York City time.

All

During the teleconference today, it was mentioned that the IR-4 Project recently held its Biopesticide Workshop. Below are the results of the priorities as ranked within each crop system. Those in dark green are expected to become funded projects while others are uncertain.

Biopesticide Program 2019

Fruit	Organic	Other	Vegetable
Spotted wing drosophila, Attract and kill	Downy mildew basil	Weed control screening	Viruses and viroids tomato
Ambrosia beetle- Laurel wilt Avocado	Fruit Spotted wing drosophila	Damping off hemp (Funded IS)	Bacterial diseases fruiting vegetables
Blueberry Gall Midge	Cucurbits striped cucumber beetle	All crops weeds	Cucurbits squash bugs
All crops Brown Marmorated Stinkbug, Plant bug, Lygus	Pumpkin, squash, cucumber Phytophthora		Yam anthracnose and tuber decay

Subject: Global Minor Use Summit and Workshop update - Friday, October 12th am New York City time.

Attachments: ATT00001.txt; 2019 Final A priorities - Canada.xlsx

Hello all,

In preparation for the October 12 conference call, please find attached the PMC Canada Minor Use priorities for 2019. These priorities were selected during our Canadian Minor Use Pesticides Priority Setting Workshop which was held in March 2018.

Hope this information will be useful for future collaboration.

Regards,
Shirley Archambault

Subject: Follow-up to Global Minor Use Workshop

Attachments: GlobalMUPriorities_INTERIMselections4Oct2017.xlsx; 1. Kunkel Update from First GMU workshop.pdf

Greeting everyone and thanks for your responses... As discussed We plan to have two calls to cover the same topics.

March 8th at 11am New York Time.

March 9th at 7 am New York Time

The call in number will be and the pass code is

Thanks again for joining the Global Minor Use Summit and Workshop. We are arranging a teleconference to discuss the final priorities from the workshop and to hopefully select cooperative projects to move forward.

We will be focusing our discussion on only the "A" priorities that came out of the discussions at the workshop. The B projects may be considered independently among interested parties and are therefore presented as fyi.

We will be looking for countries identified to step up and lead projects. We need to identify specific project champions - to raise the project as a global priority and carry the work forward.

While they maybe the same entity, we also want to identify project coordinators who's role will be more in line with addressing the regulatory requirements. They must develop the global use pattern, assess available efficacy and residue data, assess gaps in data, contact registrants, ensure global representation on projects (to extent possible) and prepare a global residue protocol.

You can see on the attached excel file that we have added several columns including project coordinators etc. We also added information about what is needed from the Registrant. In order for a project to proceed, we would need support of a registrant and likely global registrant contact(s). Other information from the registrant may include the scope of their support in all jurisdictions, such as NA, LATAM, EU, Asia, AUS, and Africa?

Some of the criteria in consideration we have to continue with a merit analysis (column headers on Excel file) is a follows:

- o Are there available solutions?
- o Registrant support globally? As noted above.
- o Clarify the use pattern is the same in all interested jurisdictions - is there a Global GAP.
- o Is the product and use already registered? Where?
- o What data (efficacy, residue) is already available to support the use?
- o Who are the identified project champions?
- o Who are the identified project coordinators? (may not always be the same as project champions)
- o Are there any crop grouping MRL opportunities? i.e. is the work being done on a residue representative crop
- o Other criteria??

We will plan to continue with these calls on a three to four month basis so that decisions can be communicated.

Finally we also expect to communicate the progress from the first minor use workshop as well.

We do hope that you will be able to join us for one of the two calls scheduled.

Kind regards,

D. Kunkel, M. Wick, S. Archambault, J. Chaput, J. Sandahl

Subject: RE: Global Minor Use Summit and Workshop update - Friday, October 12th am New York City time.

Attachments: 2019 Final A priorities - Canada.xlsx; GlobalMUPriorities 2 October 2018 (002).xlsx

Greetings, I am sending the Canadian priorities for 2019 as well as an update to the global priority database, Canada has agreed to be the champion and coordinator for the Basil project and added interest by Thailand to this project as well.

Global Minor Use Workshop/Global Project update on Friday October 12th, 2018, 7am New York City Time.

The call in number will be and the pass code is

AGENDA

GLOBAL MINOR USE SUMMIT:

- Outcomes and update
- The Global Minor Use Fund/Foundation.
- STDF Projects, as they conclude and maybe a new one
- Global Minor Use Survey update.

STDF capacity residue projects update

GMU WORKSHOP #1 and #2 update.

IR-4 2019 Priorities

PMC Canada 2019 Priorities.

List of projects that have received funding under the pesticides access grant scheme in Australia.

<http://www.agriculture.gov.au/ag-farm-food/ag-vet-chemicals/improved-access-agvet-chemicals/agvet-assistance-grants>

Opportunities for 2018/2019 regional meetings.

- CCPR - April 2019
- IUPAC - 2019
- NAFTA Technical Working Group on Pesticides – June 2019
- Etc

Other updates etc.

I hope you can join us.

Please feel free to share information etc with the group or edit/update slides...

Thanks,

Daniel Kunkel, Ph.D.

Subject: RE: Follow-up to Global Minor Use Workshop

Attachments: GlobalMUPriorities_INTERIMselections4Oct2017.xlsx

Reminder and an updated database...attached.

Call times...

March 8th at 11am New York Time tomorrow.

March 9th at 7 am New York Time Friday

The call in number will be **and the pass code is**

FYI...We had 30 cm of wet snow here in New Jersey today, but I still expect to make it to the office tomorrow...if not I will still be able to call from home.

Thanks, Dan

From: Daniel Kunkel

Subject: Follow-up to Global Minor Use Workshop

Greeting everyone and thanks for your responses... As discussed We plan to have two calls to cover the same topics.

March 8th at 11am New York Time.

March 9th at 7 am New York Time

The call in number will be **and the pass code is**

Thanks again for joining the Global Minor Use Summit and Workshop. We are arranging a teleconference to discuss the final priorities from the workshop and to hopefully select cooperative projects to move forward.

We will be focusing our discussion on only the "A" priorities that came out of the discussions at the workshop. The B projects may be considered independently among interested parties and are therefore presented as fyi.

We will be looking for countries identified to step up and lead projects. We need to identify specific project champions - to raise the project as a global priority and carry the work forward.

While they maybe the same entity, we also want to identify project coordinators who's role will be more in line with addressing the regulatory requirements. They must develop the global use pattern, assess available efficacy and residue data, assess gaps in data, contact registrants, ensure global representation on projects (to extent possible) and prepare a global residue protocol.

You can see on the attached excel file that we have added several columns including project coordinators etc. We also added information about what is needed from the Registrant. In order for a project to proceed, we would need support of a registrant and likely global registrant contact(s). Other information from the registrant may include the scope of their support in all jurisdictions, such as NA, LATAM, EU, Asia, AUS, and Africa?

Some of the criteria in consideration we have to continue with a merit analysis (column headers on Excel file) is as follows:

- o Are there available solutions?
- o Registrant support globally? As noted above.
- o Clarify the use pattern is the same in all interested jurisdictions - is there a Global GAP.
- o Is the product and use already registered? Where?
- o What data (efficacy, residue) is already available to support the use?
- o Who are the identified project champions?
- o Who are the identified project coordinators? (may not always be the same as project champions)
- o Are there any crop grouping MRL opportunities? i.e. is the work being done on a residue representative crop
- o Other criteria??

We will plan to continue with these calls on a three to four month basis so that decisions can be communicated.

Finally we also expect to communicate the progress from the first minor use workshop as well.

We do hope that you will be able to join us for one of the two calls scheduled.

Kind regards,

D. Kunkel, M. Wick, S. Archambault, J. Chaput, J. Sandahl

Subject: RE: Follow-up to Global Minor Use Workshop

Attachments: Update from First GMU workshop Kunkel03_18.pptx; CCPR Side Event GMUS 3 and Considerations for JMPR flyer Final.docx; Copy of GlobalMUPriorities_INTERIMselections March 30_2018.xlsx

For the nearly 30 folks that joined us on the teleconference thank you! I have updated the spread sheet (attached) and added comments from our call.

Please remember that we focused our discussion on setting the final "A" priority for each category. Please note that the "B" projects are FYI and may be considered independently among interested parties

We were able to identify a number of countries to step up and lead projects and be project champions. However there are still some slots that need to be filled, please review the excel file and let me know if you can help in this regard.

We also added project coordinators who's role will be to address the regulatory requirements, set a Global use pattern (GAP), assess available efficacy and residue data, assess gaps in data, contact registrants, ensure global representation on projects (to extent possible) and prepare a global residue protocol.

Other updates from the call are listed below..

From the Summit outcomes.

- Continue to establish minor use champions from regions

- Developing a list of low toxicity/exempt compounds – Michael Braverman and Jeroen Meeussen

- Promote use of APEC-like procedures for the establishment of import tolerance / MRLs

- Global MRL Database

 - CCPR side event and APEC Workshop (see attached and join us if you are attending CCPR)

 - WTO - MRL Workshop in February.

- White paper on capacity building – Jason Sandahl to lead.

- Define Minor Uses – Joseph Morrall AU – hopefully you have responded, I know we discussed extending the deadline to March 30th.

Update from 2015 Workshop - I have attached updated slides...if you have further info, please add and send back to me

We will attempt another call in June!

Thanks, Dan

Subject: Follow-up to Global Minor Use Workshop

Greeting everyone and thanks for your responses... As discussed We plan to have two calls to cover the same topics.

March 8th at 11am New York Time.

March 9th at 7 am New York Time

The call in number will be and the pass code is

Thanks again for joining the Global Minor Use Summit and Workshop. We are arranging a teleconference to discuss the final priorities from the workshop and to hopefully select cooperative projects to move forward.

We will be focusing our discussion on only the "A" priorities that came out of the discussions at the workshop. The B projects may be considered independently among interested parties and are therefore presented as fyi.

We will be looking for countries identified to step up and lead projects. We need to identify specific project champions - to raise the project as a global priority and carry the work forward.

While they maybe the same entity, we also want to identify project coordinators who's role will be more in line with addressing the regulatory requirements. They must develop the global use pattern, assess available efficacy and residue data, assess gaps in data, contact registrants, ensure global representation on projects (to extent possible) and prepare a global residue protocol.

You can see on the attached excel file that we have added several columns including project coordinators etc. We also added information about what is needed from the Registrant. In order for a project to proceed, we would need support of a registrant and likely global registrant contact(s). Other information from the registrant may include the scope of their support in all jurisdictions, such as NA, LATAM, EU, Asia, AUS, and Africa?

Some of the criteria in consideration we have to continue with a merit analysis (column headers on Excel file) is a follows:

- o Are there available solutions?
- o Registrant support globally? As noted above.
- o Clarify the use pattern is the same in all interested jurisdictions - is there a Global GAP.
- o Is the product and use already registered? Where?
- o What data (efficacy, residue) is already available to support the use?
- o Who are the identified project champions?
- o Who are the identified project coordinators? (may not always be the same as project champions)
- o Are there any crop grouping MRL opportunities? i.e. is the work being done on a residue representative crop
- o Other criteria??

We will plan to continue with these calls on a three to four month basis so that decisions can be communicated.

Finally we also expect to communicate the progress from the first minor use workshop as well.

We do hope that you will be able to join us for one of the two calls scheduled.

Subject: RE: Shutdown activities

Rick:

I have shared this message with our members. The company mentioned may be the same one that has contacted you.

Many of you will recall that during the 2013 government shutdown, EPA Regions could not process Notices of Arrival (NOAs) for imported pesticides. Subsequently, a [process for electronic submission](#) of NOAs was established via the [Automated Commercial Environment \(ACE\)](#) to avoid the problems for a future shutdown (which we are now living). However, even that ACE web site now warns: *"Due to the lapse in federal funding, this website will not be actively managed. ... Transactions submitted via this website might not be processed and we will not be able to respond to inquiries until after appropriations are enacted."*

One CLA member has just discovered that the electronic process does not completely cover the following import actions, which raise flags and require oversight/approval by a person:

- products that are currently stored in or are imported into free trade zones;
- products moving via interplant transfers; and
- R&D test material.

If you are experiencing problems in this regard, please let me know. And especially if you have been able to resolve them.

Subject: Re: Shutdown activities

In terms of imports, a clarification I received yesterday is that someone from the regional offices is available if CBP needs assistance.

I have heard from at least one registrant that, at least in one region, their experience is that paper-based NOAs are not being processed due to the shutdown.

Subject: RE: CLA and EPA Smart Sectors - EPA West

Kristinn,

Thanks for a most productive meeting today—and thanks to all your EPA colleagues who committed time for our discussion.

As follow up, I have:

1. You and Janet Collins will be the principal contacts as we advance and refine added ideas for Smart Sectors engagement with the April RISE CLA Regulatory Conference.
2. We invite you and whomever is appropriate to represent EPA Smart Sectors Program to come meet with our CLA Strategic Oversight Council (SOC) January 25 or 26 here at our offices. If it's appropriate also for Jeff Sands to be with your Smart Sectors group great, or if we can find a separate time for Jeff to meet with our SOC group (to talk more specific policy issues) we can go either way—maybe you and Jeff can huddle and work out what you think is best and get back to me?

Topics that seem appropriate to review with our SOC by you would include:

- What Smart Sectors is all about and how individual companies can engage as well as industry groups like CLA
- Some of the topics we reviewed that are of importance across several different offices of EPA including OPP, OGC, ORD, OW, etc.
- What we are working on the coordinate with respect to the April Regulatory Conference—including invite to the Administrator to speak (we'll get our formal invite letter to him/Haley Ford tomorrow)
- How the role of Ag Advisor is shaping up under Administrator Pruitt (Jeff!)
- How Smart Sectors is looking at IT systems, and other means to better streamline industry reporting to EPA to streamline compliance burden, etc.

Meantime tomorrow I'll ask Mary Jo to get to you tomorrow a full list of the member company reps on our SOC and a general time outline of our meeting so you might choose from a "menu of time slots" on January 25 and 26 that work best for you all.

Thanks again, Jay

Subject: CLA and EPA Smart Sectors - EPA West

Good morning and happy 2018 everyone!

I am looking forward to our meeting this afternoon at 1 p.m. in 4128 EPA West. If you are calling in, the number is 866-299-3188, pass code: 202-343-9062#.

If you are braving the cold and heading over here in person, please arrive a few minutes early to allow time to go through EPA's security screening. Please enter through EPA's West entrance on Constitution Ave (between 14th St and 12th St), and let the guards know you are here to see me. If you need more details, here is a helpful EPA website for visitors: <https://www.epa.gov/aboutepa/visiting-epa-headquarters>

This email is being sent to everyone who received the calendar invitation, so please forward to anyone who may not have been on the original invitation.

Thanks, and see you soon,
Kristinn

Member companies of CropLife America need to contact EPA regional personnel regarding pesticide import shipments arriving during the partial government shutdown. We understand that personnel should be designated in each region to handle such issues. Can you folks help me identify whom they should contact in your respective regions, and how to do so?

Please share this information with the folks in your company who work on imports.

From the list of regional contacts posted at <https://www.epa.gov/compliance/regional-contacts-questions-concerning-notices-arrival-epa-form-3540-1>. I called all of the phone numbers and sent one email to the entire list with the following request:

"Member companies of CropLife America need to contact EPA regional personnel regarding pesticide import shipments arriving during the partial government shutdown. We understand that personnel should be designated in each region to handle such issues. Can you folks help me identify whom they should contact in your respective regions, and how to do so?"

Most recorded voice mail greetings and automated email responses explained that the individuals would be out for the duration of the shutdown, and not checking email or voicemail. However, for all regions but 4, 7, and 10. I found some encouragement. Here is what I have learned. I will pass on any updates and corrections I get, including what you folks provide.

Region/State	Primary Contact	Notes
--------------	-----------------	-------

Region 1 (CT, MA, ME, NH, RI, VT)	Kan Tham (tham.kan@epa.gov) (617) 918-1872	From "out of office" email response: "If you are with the US Customs and Border Protection, Cargo Warehouse Import/Export, I can respond to inquiries regarding pesticides Import and can be reached at 617 918 1872."
Region 2 (NJ, NY, PR, VI)	Michael Brannick (brannick.michael@epa.gov) 732-321-4349	From "out of office" email response: "If you are with US Customs and Border Protection, I can respond to inquiries regarding pesticides imports and can be reached at 732-321-4349."
Region 3 (DE, DC, MD, PA, VA, WV)	Kyla Townsend (townsend.kyla@epa.gov) 215-814-2045	From direct email response: On email inquiries for Region 3, copy – a <ul style="list-style-type: none"> • Kyla Townsend; • Diana Esher (215-814-2706, mobile: 610-306-4043, Esher.Diana@epa.gov); and • Cecil Rodriguez (215-814-2683, Rodriguez.Cecil@epa.gov).
Region 4 (AL, FL, GA, KY, MS, NC, SC, TN)	Kimberly Tomczak (tomczak.kimberly@epa.gov) 404-562-8987	"I am out of the office for the duration of the government shutdown. I will not be checking messages, but will answer your email upon my return to the office."
Region 5 (IL, IN, MI, MN, OH, WI)	David Star (star.david@epa.gov) 312-886-6009	Confirmed by text message that he can "help importers during the shsutdown with problems on pesticide Notices of Arrival." Mobile phone: 815-735-5016
Region 6 (AR, LA, NM, OK, TX)	Kristin Dunbar (dunbar.kristin@epa.gov) 214-665-8129	Direct email response: They can contact me by email. I am checking my email sparsely throughout the shutdown.
Region 7 (IA, KS, MO, NE)	Tracey Ramsey (ramsey.tracey@epa.gov) 913-551-7475	From out of office email response: Out for the duration of the shutdown, not checking messages.
Region 8 (CO, MT, ND, SD, UT, WY)	Christine Tokarz (tokarz.christine@epa.gov) 303-312-6147	Confirmed by text message: "Yes, if they are imports entering Region 8." Use mobile phone 518-416-8965; also checking email.
Region 9 (AS, AZ, CA, GU, HI, MP, NV, Trust Territories)	Allison Watanabe (watanabe.allison@epa.gov) 213-244-1807	From "out of office email response: "For the duration of the government shutdown, my duties are limited to responding to pesticide import emergencies. If you are a CBP officer, please email me or leave a voice mail message. I will check my email periodically and respond to your message accordingly."
Region 10 (AK, ID, OR, WA)	Andrew Landry (landry.andrew@epa.gov) 206-553-1504	Standard voice mail greeting

Attachments: Pest Management Cross-Sector Dialogue RSVP list (3.19.19)2.xlsx

Thank you so much, Rick. I'm grateful for your interest and availability, especially on such short notice.

Attached is the current RSVP list, which we expect will grow just a little more between now and Tuesday. We will likely have 60-65 folks in attendance. I'm sure a condensed version of your standard presentation would work well for this audience.

I'm traveling to Illinois for meetings with farmers over the next two days; however, I'm happy to find some time to chat when I'm not on a plane. I agree that it would be helpful to connect in advance of next week so I can provide a little more context/background. In short, food companies are increasingly getting questions about pesticide use in their supply chains, and the entire industry is discussing how to improve environmental outcomes and provide assurances to consumers. At a minimum, Field to Market member companies need to have a basic understanding of the pesticide registration process before embarking any more deeply into the topic.

Please let me know if you have a preferred time to talk tomorrow or Friday and we can set up a few minutes to chat. (First thing tomorrow morning would be ideal for me, if possible. My flight takes off at noon.)

Rod—

Thanks for your note. Yes, I think I should be able to do this. We have a standard presentation on the role of EPA in oversight of pesticide registration and use that can be condensed to the 10-minute timeframe.

If there anything more that I should know about this group? Should we find some time to chat later this week?

Subject: Invitation for March 19 event on Responsible Pest Management

Rick,

My apologies for the short notice, but we would like to invite you or a colleague from EPA's Office of Pesticide Programs to present at Field to Market's upcoming workshop on Responsible Pest Management. The event will take place on Tuesday, March 19 from 1:00 – 5:00 p.m. at 777 N. Capitol Street, NE. Field to Market is the largest multi-stakeholder nonprofit organization that's working to define, measure and advance the sustainability of commodity crop production in the United States. Our members span the agricultural supply chain from grower groups to major consumer-facing brand and retail companies. Our event next Tuesday is centered on finding common ground for how the ag value chain can promote responsible pest management to farmers while providing sustainability assurances to consumers.

We would specifically like to invite you or another representative from OPP to offer brief remarks during the follow portion of the program:

Regulatory framework: Understanding product registration and labeling laws in the United States

How does EPA's product registration and review process seek to protect human health and the environment, and how is enforcement managed at a state level?

By opening up our event with 10 minutes of high-level remarks from EPA about the pesticide regulatory framework in the U.S., you can provide our audience with necessary context and allow the supply chain to focus on additional ways to promote responsible product use that achieves improved environmental and human health outcomes. Attendees will have widely differing backgrounds and expertise on pesticide policy – ranging from representatives of the National Corn Growers Association, American Soybean Association, National Cotton Council, CropLife America, Syngenta, The Nature Conservancy, General Mills, Panera Bread, Unilever, and American Bakers Association.

Again, I apologize for the last minute nature of this request; however, we we've been working quickly to plan this event on short notice due to significant member interest on the subject. We hope you or a colleague will be available to attend and offer brief remarks. Thanks for your considering and please let me know if you have any questions.

Regards,

Rod Snyder

Rick and Darlene,

Once again, I appreciated the opportunity this morning to hear your voices and meet you both by phone! It's been way too long.

Rick, I'm drafting the agenda for our meeting with EPA next week, and I'd like to include the list of EPA attendees. If you're okay with that, could you or Darlene send me that list of names and their titles?

Also, would you be okay if we have staff present taking a minimal number of photographs? These would be for internal use only. Staff will make the best effort to be unobtrusive.

Thanks,

MJ

Subject: Shutdown questions

A few more questions:

- Is PRD able to do any work during the shutdown, supported by maintenance fees?
- Will current open comment periods be extended, in particular for Registration Review actions? It appears that dockets are still accepting electronic submissions. I count 51 OPP dockets with comments due in the next 30 days. I didn't search beyond that.

Subject: Re: Dockets during shutdown

Ray—

Thanks for your note. Since registration review activities have not been excepted from the furlough, we cannot act on these requests while the agency is shutdown. We will need to consider these requests after the agency resumes normal operations. If we decide that the request(s) is/are warranted, I suspect that we will have to issue new Federal Register notices to re-open the respective comment periods.

Thank you for the kind words, Cindy.

We know that communication on this topic is important and dealing with all this CCPR stuff isn't necessarily easy unless you are deep into it on a regular and routine basis and have been for a number of years, so we do try to make getting the word out and simplifying this as much as possible a priority.

I will add that a lot of this "keeping up" and "messaging out" that you speak of is done or organized by Aaron. He does a great job and I am very appreciative it.

David.

Subject: CCPR-51 -- JMPR Schedule, Priority List, and Call for Nominations

Dear CCPR Interest Group Members,

Per David's previous email, we look forward to meeting with you on September 27 and wanted to share information on the CCPR Call for Nominations. Please refer to the following attachments for further information on the CCPR schedule and nomination process:

1. Nomination Form for CCPR
2. Electronic Working Group (eWG) Broadcast Letter
3. CCPR Schedules and Priority Lists

CCPR Call for Nominations

The Codex Electronic Working Group (eWG) on Priorities has requested additional nominations to the Priority List of Pesticides from the U.S. Delegation, to be considered at the next CCPR meeting. Nominations are due to CCPR by **November 30**. Please aim to submit nominations to the US Delegation on or before **November 9**. To submit a nomination for consideration by the US Delegation to CCPR, please respond electronically to David Miller (Miller.DavidJ@epa.gov) and Aaron Niman (Niman.Aaron@epa.gov) and fill out the attached nomination form. Please also review the draft Priority Lists of Pesticides attachment for any updates (commodities, field trial information, etc.) or opportunities to reschedule currently scheduled compounds.

Information on the CCPR schedule and priority list is provided in the attached letter and Excel spreadsheet and also available on the eWG Establishment of the CCPR Schedules and Priority Lists of Pesticides Forum on the Codex IT Platform. As described in the eWG broadcast letter and summarized below, the 2019 schedule is closed and the 2020 schedule is open for nominations.

CCPR Annual Schedule	Open for Nominations
2019 Normal JMPR Meeting	Closed*
<ul style="list-style-type: none"> • New Compounds and New Uses and Other Evaluations: 7 new compounds on schedule (Pyrifluquinazon, Metconazole, Triflumuron, Pyflubumide, Pyridate, Valifenalate Afidopyropen) 	
<ul style="list-style-type: none"> • Periodic Reviews: 11 compounds are listed, but only 4 are currently supported. 	
2019 Extraordinary Meeting	Closed
<ul style="list-style-type: none"> • New Uses and Other Evaluations: 20 new uses on schedule. 	
2020 Proposed Schedule	Open
<ul style="list-style-type: none"> • New Compounds: 8 compounds are listed for evaluation. However, only 2 compounds are confirmed based on the requirement to submit evidence of national registration. • New Uses and Other Evaluations: Schedule lists 43 compounds for new uses and other evaluations. However, only 9 compounds are confirmed on the schedule based on the requirement to provide evidence of national registration. • Periodic Reviews: Finalization of a 2020 proposed schedule of periodic reviews is contingent upon several factors. The most significant factor is addressing compounds listed in the 2019 proposed schedule. There are seven compounds (bromopropylate [70], Aldicarb [177], Amitraz [122], Azinphos-methyl [02], Dicloran [83], Fenarimol [192] and Phosalone [60]) listed in closed schedules for 2018 and 2019 which are tagged for deletion from the CCPR Pesticides List. 	

* Subject to agreement by the JMPR Secretariat, and in consultation with the nominating country / manufacturer, commodities may be added or deleted for both new compounds and 'new use evaluations' listed on the 2019 schedule.

Additional Instructions:

- We ask that nominators fill out the attached blank nomination form, including the table at the top.
 - For new chemical nominations, additional uses for scheduled compounds, or additional uses for compounds not currently scheduled- Please complete and return the attached nomination form. A complete nomination form is especially important for chemicals that have not been reviewed by JMPR in the past.
 - If you are a commodity representative/grower, please provide the following information in lieu of the nomination form: Contact, chemical requested, commodity, pest issue, and any other relevant information. The U.S. Delegation will work with registrants/IR-4 to determine available data and support for any of these requests.
- Please also take the time to review the attachment of Priority Lists of Pesticides for opportunities to reschedule currently scheduled compounds, as 2019 is well over the capacity for JMPR review.

Regards,

Aaron Niman

Please share this information with the folks in your company who work on imports.

From the list of regional contacts posted at <https://www.epa.gov/compliance/regional-contacts-questions-concerning-notice-arrival-epa-form-3540-1>. I called all of the phone numbers and sent one email to the entire list with the following request:

“Member companies of CropLife America need to contact EPA regional personnel regarding pesticide import shipments arriving during the partial government shutdown. We understand that personnel should be designated in each region to handle such issues. Can you folks help me identify whom they should contact in your respective regions, and how to do so?”

Most recorded voice mail greetings and automated email responses explained that the individuals would be out for the duration of the shutdown, and not checking email or voicemail. However, for all regions but 4, 7, and 10. I found some encouragement. Here is what I have learned. I will pass on any updates and corrections I get, including what you folks provide.

Region/State	Primary Contact	Notes
Region 1 (CT, MA, ME, NH, RI, VT)	Kan Tham (tham.kan@epa.gov) (617) 918-1872	From “out of office” email response: “If you are with the US Customs and Border Protection, Cargo Warehouse Import/Export, I can respond to inquiries regarding pesticides Import and can be reached at 617 918 1872.”
Region 2 (NJ, NY, PR, VI)	Michael Brannick (brannick.michael@epa.gov) 732-321-4349	From “out of office” email response: “If you are with US Customs and Border Protection, I can respond to inquiries regarding pesticides imports and can be reached at 732-321-4349.”
Region 3 (DE, DC, MD, PA, VA, WV)	Kyla Townsend (townsend.kyla@epa.gov) 215-814-2045	From direct email response: On email inquiries for Region 3, copy – a <ul style="list-style-type: none"> • Kyla Townsend; • Diana Esher (215-814-2706, mobile: 610-306-4043, Esher.Diana@epa.gov); and • Cecil Rodriguez (215-814-2683, Rodriguez.Cecil@epa.gov).
Region 4 (AL, FL, GA, KY, MS, NC, SC, TN)	Kimberly Tomczak (tomczak.kimberly@epa.gov) 404-562-8987	“I am out of the office for the duration of the government shutdown. I will not be checking messages, but will answer your email upon my return to the office.”
Region 5 (IL, IN, MI, MN, OH, WI)	David Star (star.david@epa.gov) 312-886-6009	Confirmed by text message that he can “help importers during the shutdown with problems on pesticide Notices of Arrival.” Mobile phone: 815-735-5016
Region 6 (AR, LA, NM, OK, TX)	Kristin Dunbar (dunbar.kristin@epa.gov) 214-665-8129	Direct email response: They can contact me by email. I am checking my email sparsely throughout the shutdown.
Region 7 (IA, KS, MO, NE)	Tracey Ramsey (ramsey.tracey@epa.gov) 913-551-7475	From out of office email response: Out for the duration of the shutdown, not checking messages.
Region 8 (CO, MT, ND, SD, UT, WY)	Christine Tokarz (tokarz.christine@epa.gov) 303-312-6147	Confirmed by text message: “Yes, if they are imports entering Region 8.” Use mobile phone 518-416-8965; also checking email.
Region 9 (AS, AZ, CA, GU, HI, MP, NV, Trust Territories)	Allison Watanabe (watanabe.allison@epa.gov) 213-244-1807	From “out of office email response: “For the duration of the government shutdown, my duties are limited to responding to pesticide import emergencies. If you are a CBP officer, please email me or leave a voice mail message. I will check my email periodically and respond to your message accordingly.”

Region 10 (AK, ID, OR, WA)	Andrew Landry (landry.andrew@epa.gov) 206-553-1504	Standard voice mail greeting

Ray—

Thanks for your note.

PRD staff are also on furlough as part of the shutdown.

If [regulations.gov](https://www.regulations.gov) is accepting comments, is there a need to extend comment periods across the board. We can consider on a case-by-case basis, as we always do, requests to extend comment periods.

In terms of imports, a clarification I received yesterday is that someone from the regional offices is available if CBP needs assistance.

I have heard from at least one registrant that, at least in one region, their experience is that paper-based NOAs are not being processed due to the shutdown.

Subject: Invitation to meet with CLA's Registration Committee Feb 19

Rick – as chair of CLA's Registration Committee, we would like to invite you to our next Registration Committee meeting (Tuesday, Feb 19). With the recent shut-down, we anticipate the Agency is facing many questions from registrants on how PRIA actions are being renegotiated and other impacts of the shut-down. This would be an opportunity to address these questions in total instead of individual discussions with various registrants. Additionally we would offer to facilitate a meeting between you and our new President and CEO of CLA, Chris Novak (depending on his availability).

Please let me know if you would be available to meet with the Registration Committee on Tuesday, Feb 19. We can accommodate your schedule anytime between 9:30 and 3:00 PM.

(This meeting will be held in the offices of Arent Fox LLP (1050 Connecticut Ave, NW, Washington DC) owing to multiple meetings simultaneously occurring on the same day in the CLA offices.)

Thanks!

Regards,

Karen Cain

Hi Rick,

Thought you and your bee health team at EPA would be interested in this new bee program in CA— as described in the note below.

I just spoke at the annual meeting of the California Association of Pest Control Advisors (CAPCA) — their CEO Ruthann Anderson is copied here, as is Fieldwatch CEO Stephanie Regagnon.

CAPCA and Fieldwatch are teaming up to implement what I think may be the most comprehensive bee tracking and transparency program I've seen yet— and in the state with the highest pollination services demand. They want it operational for 2019.

I've also shared this with USDA.

See you in a couple weeks at PPDC !

Jay

Mary Jo—

Thanks for your note. I've placed a hold on the OPP division directors' calendars for this meeting. It would be hopeful to have a quick call with the appropriate person from CLA to finalize the agenda. Several of our division directors will be at the AAPCO annual meeting in Old Town Alexandria, so we are going to need to figure out how to staff both events.

Subject: Meeting Request: 2019 CLA Board of Directors Visit with EPA

Good morning, Rick,

We are making plans for our Winter Board of Directors Meeting in March 2019, and as is tradition, we would like to make arrangements for our Board to visit with EPA staff, to discuss current and emerging topics of the day (attached is the agenda from last year's meeting, to give you an idea of the program content). We have set aside some time on our agenda, for Tuesday morning, March 5, 9:30a-11:30a, to meet with you and your staff. In the interest of time and convenience, we could host the meeting at the Renaissance Arlington Capital View (Studio D), which is within walking distance of your offices at Potomac Yard.

Please let me know if you and your staff would be available to meet with the Board.

Thanks for your assistance with this.

Happy New Year!

MJ

Hi Rick,

Thought you and your bee health team at EPA would be interested in this new bee program in CA— as described in the note below.

I just spoke at the annual meeting of the California Association of Pest Control Advisors (CAPCA) — their CEO Ruthann Anderson is copied here, as is Fieldwatch CEO Stephanie Regagnon.

CAPCA and Fieldwatch are teaming up to implement what I think may be the most comprehensive bee tracking and transparency program I've seen yet— and in the state with the highest pollination services demand. They want it operational for 2019.

I've also shared this with USDA.

See you in a couple weeks at PPDC !

Jay

Subject: Invitation for March 19 event on Responsible Pest Management

Rick,

My apologies for the short notice, but we would like to invite you or a colleague from EPA's Office of Pesticide Programs to present at Field to Market's upcoming workshop on Responsible Pest Management. The event will take place on Tuesday, March 19 from 1:00 – 5:00 p.m. at 777 N. Capitol Street, NE. Field to Market is the largest multi-stakeholder nonprofit organization that's working to define, measure and advance the sustainability of commodity crop production in the United States. Our members span the agricultural supply chain from grower groups to major consumer-facing brand and retail companies. Our event next Tuesday is centered on finding common ground for how the ag value chain can promote responsible pest management to farmers while providing sustainability assurances to consumers.

We would specifically like to invite you or another representative from OPP to offer brief remarks during the follow portion of the program:

Regulatory framework: Understanding product registration and labeling laws in the United States

How does EPA's product registration and review process seek to protect human health and the environment, and how is enforcement managed at a state level?

By opening up our event with 10 minutes of high-level remarks from EPA about the pesticide regulatory framework in the U.S., you can provide our audience with necessary context and allow the supply chain to focus on additional ways to promote responsible product use that achieves improved environmental and human health outcomes. Attendees will have widely differing backgrounds and expertise on pesticide policy – ranging from representatives of the National Corn Growers Association, American Soybean Association, National Cotton Council, CropLife America, Syngenta, The Nature Conservancy, General Mills, Panera Bread, Unilever, and American Bakers Association.

Again, I apologize for the last minute nature of this request; however, we we've been working quickly to plan this event on short notice due to significant member interest on the subject. We hope you or a colleague will be available to attend and offer brief remarks. Thanks for your considering and please let me know if you have any questions.

Regards,

Rod Snyder

Hi, Rick,

Beau Greenwood stopped by my office earlier, to ask me to work on setting up a call with you and Alexandra, and our CEO Chris Novak (and Beau), to in advance of her presentation to the Board on March 5. What's the best way to go about this? I'm happy to offer some times that Chris is available next week:

- Tuesday, February 26 – between 10:00a and 11:15a, or after 3:30p
- Wednesday, February 27 – between 10:00a and 11:30a
- Thursday, February 28 – between 11:30a and 1:00p, 2:00p (for 30-45 minutes), or 4:00p or after

I've copied Alexandra's staff person here, in case it's helpful for your offices to coordinate calendars.

I look forward to hearing from you!

Good morning and happy 2018 everyone!

I am looking forward to our meeting this afternoon at 1 p.m. in 4128 EPA West. If you are calling in, the number is **Conference Line/Code / Ex. 6**

If you are braving the cold and heading over here in person, please arrive a few minutes early to allow time to go through EPA's security screening. Please enter through EPA's West entrance on Constitution Ave (between 14th St and 12th St), and let the guards know you are here to see me. If you need more details, here is a helpful EPA website for visitors: <https://www.epa.gov/aboutepa/visiting-epa-headquarters>

This email is being sent to everyone who received the calendar invitation, so please forward to anyone who may not have been on the original invitation.

Thanks, and see you soon,
Kristinn

Hi, Rick,

We are preparing a suggested list of topics for discussion at our meeting with you and your staff. Would you have some time next week for a phone call with Chris Novak to finalize the agenda, as you suggest below? He would be available for a call:

- Wednesday, February 20 – between 2:30p and 3:30p
- Thursday, February 21 – between 10:30a and 11:30a, or 2:00 and 3:00p

If those times don't work, I can look at the week of February 25 as well.

Mary Jo—

Thanks for your note. I've placed a hold on the OPP division directors' calendars for this meeting. It would be hopeful to have a quick call with the appropriate person from CLA to finalize the agenda. Several of our division directors will be at the AAPCO annual meeting in Old Town Alexandria, so we are going to need to figure out how to staff both events.

Good morning, Rick,

We are making plans for our Winter Board of Directors Meeting in March 2019, and as is tradition, we would like to make arrangements for our Board to visit with EPA staff, to discuss current and emerging topics of the day (attached is the agenda from last year's meeting, to give you an idea of the program content). We have set aside some time on our agenda, for Tuesday morning, March 5, 9:30a-11:30a, to meet with you and your staff. In the interest of time and convenience, we could host the meeting at the Renaissance Arlington Capital View (Studio D), which is within walking distance of your offices at Potomac Yard.

Please let me know if you and your staff would be available to meet with the Board.

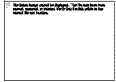

Thanks for your assistance with this.

Happy New Year!

Janet--

We heard back from our building management people. Unfortunately, we were not able to get permission from the building owner to place the piece of farm equipment on the Potomac Yards site. Our building manager did suggest an alternative that you might want to explore. The Regal Cinema (less than a mile from PY) has two very large parking lots. Other organizations have received permission to use their lots during the day for various activities. Perhaps that would be a possibility?

Rick- I am following up on a discussion you had with Jay regarding the opportunity for use of EPA space for an equipment demonstration during the CLA/RISE Regulatory Conference in April.

Have you been able to gain approval for the request?

Many thanks

Janet--

Thanks for your note. 3:14am?! Wow, your day starts early!

I had someone working on this. Let me check in with them this morning. Preliminarily, it wasn't looking like we were going to be able to make it work.

Rick- I am following up on a discussion you had with Jay regarding the opportunity for use of EPA space for an equipment demonstration during the CLA/RISE Regulatory Conference in April.

Have you been able to gain approval for the request?

Many thanks

Janet

Subject: RE: Invitation for March 19 event on Responsible Pest Management

Thank you so much, Rick. I'm grateful for your interest and availability, especially on such short notice.

Attached is the current RSVP list, which we expect will grow just a little more between now and Tuesday. We will likely have 60-65 folks in attendance. I'm sure a condensed version of your standard presentation would work well for this audience.

I'm traveling to Illinois for meetings with farmers over the next two days; however, I'm happy to find some time to chat when I'm not on a plane. I agree that it would be helpful to connect in advance of next week so I can provide a little more context/background. In short, food companies are increasingly getting questions about pesticide use in their supply chains, and the entire industry is discussing how to improve environmental outcomes and provide assurances to consumers. At a minimum, Field to Market member companies need to have a basic understanding of the pesticide registration process before embarking any more deeply into the topic.

Please let me know if you have a preferred time to talk tomorrow or Friday and we can set up a few minutes to chat. (First thing tomorrow morning would be ideal for me, if possible. My flight takes off at noon.)

Regards,

Rod Snyder

Rod—

Thanks for your note. Yes, I think I should be able to do this. We have a standard presentation on the role of EPA in oversight of pesticide registration and use that can be condensed to the 10-minute timeframe.

If there anything more that I should know about this group? Should we find some time to chat later this week?

Subject: Invitation for March 19 event on Responsible Pest Management

Rick,

My apologies for the short notice, but we would like to invite you or a colleague from EPA's Office of Pesticide Programs to present at Field to Market's upcoming workshop on Responsible Pest Management. The event will take place on Tuesday, March 19 from 1:00 – 5:00 p.m. at 777 N. Capitol Street, NE. Field to Market is the largest multi-stakeholder nonprofit organization that's working to define, measure and advance the sustainability of commodity crop production in the United States. Our members span the agricultural supply chain from grower groups to major consumer-facing brand and retail companies. Our event next Tuesday is centered on finding common ground for how the ag value chain can promote responsible pest management to farmers while providing sustainability assurances to consumers.

We would specifically like to invite you or another representative from OPP to offer brief remarks during the follow portion of the program:

Regulatory framework: Understanding product registration and labeling laws in the United States

How does EPA's product registration and review process seek to protect human health and the environment, and how is enforcement managed at a state level?

By opening up our event with 10 minutes of high-level remarks from EPA about the pesticide regulatory framework in the U.S., you can provide our audience with necessary context and allow the supply chain to focus on additional ways to promote responsible product use that achieves improved environmental and human health outcomes. Attendees will have widely differing backgrounds and expertise on pesticide policy – ranging from representatives of the National Corn Growers Association, American Soybean Association, National Cotton Council, CropLife America, Syngenta, The Nature Conservancy, General Mills, Panera Bread, Unilever, and American Bakers Association.

Again, I apologize for the last minute nature of this request; however, we we've been working quickly to plan this event on short notice due to significant member interest on the subject. We hope you or a colleague will be available to attend and offer brief remarks. Thanks for your considering and please let me know if you have any questions.

Regards,

Rod Snyder

Subject: Agenda - Monday (February 25th) Meeting of the National Stakeholder Team for PSEP Funding
Attachments: Press Examples - 2019 National Pesticide Safety Education Month.docx

Hello, everyone. Yesterday was the halfway point for 2019 National Pesticide Safety Education Month. Thanks to everyone on and beyond the team who has been spreading the word using one of the five different news stories or their

own story (some examples attached). There is still plenty of time to sponsor this year's initiative – its purpose is to reinforce core principles of safe pesticide use with many audiences and raise awareness of and support for the land-grant university Pesticide Safety Education Programs. Hats off to PSEPs for all they do to promote safe use!

Below is the agenda for the next full team meeting.

Agenda, Full Team Meeting, February 25th – 11 AM ET

Conference Line/Code / Ex. 6

Everyone is welcome to submit inputs, questions, etc. in advance of or after the meeting, whether you can attend or not. Draft minutes will be circulated promptly.

1. Welcome and Lead the Meeting – *Jim Burnette (North Carolina Department of Agriculture and Consumer Services)*
2. Positive Outcomes of the PSEP-IMI Contracts to Strengthen State PSEPs (seventh in a series)
 - *Thia Walker (Colorado State University PSEP)*
 - *Glenn Miller (University of Nevada Administration)*
3. Startup Planning for 2020 National Pesticide Safety Education Month – 2019 learnings/suggestions for 2020
 - *John Patten (New Jersey Green Industry Council/Green Industry Consultant LLC)*
 - *Gene Merkl (Mississippi State University PSEP)*
4. IPM Workgroup – *Ronda Hirnyck (University of Idaho PSEP)* – outcomes/first meeting of 2019, next steps
5. Upcoming AAPCO presentation – *Tim Drake (Clemson University Department of Pesticide Regulation)*
6. Adopt-A-PSEP – Sponsorships to-date (for 2019 National Pesticide Safety Education Month) – *Wayne Buhler (North Carolina State University PSEP)*
7. Other Updates (time permitting or as addendums to minutes) – *All*

Subject: Quick Update - National Stakeholder Team Activities

Here is a quick update on recent activities, replacing a January full team meeting.

National Pesticide Safety Education Month

A press release is in development for joint release by WSSA, APS and ESA. A story will run in NASDA's newsletter and member update this month, and another story will be offered to the IPM Centers. NPMA announced the event in its newsletter last week. All team members are invited to publicize the two goals of this initiative within their organizations and with their customers – 1) to reinforce core principles of safe pesticide use with many audiences and 2) to raise awareness of and support for the land-grant university Pesticide Safety Education Programs.

Five [videos](#) of PSEP coordinators and State Lead Agency personnel answering questions have now been posted on the Pesticide Safety Education Month webpage; five more are coming. Thanks to Lisa Blecker, Wayne Buhler, Tony Cofer, Jon Johnson, Derrick Lastinger, Gene Merkl, Clyde Ogg, Don Renchie, Mimi Rose, Sherman Takatori, Cecil Tharp, and Liza Fleeson Trossbach for their informative and engaging answers, and to Certified Training Institute for donating the video productions.

EPA has joined USDA as a government sponsor of this initiative - thanks to Richard Pont and Rubella Goswami for their assistance.

For easiest download of any of the materials associated with National Pesticide Safety Education Month, for your own use, modification and outreach, go to the dedicated section on the [National Stakeholder Team website](#). Thanks to Mike and Whitney Weaver for developing this website for the team.

IPM Workgroup

If you are interested in serving on the IPM Workgroup, please [email Ronda Hirnyck](#). This workgroup is charged with prioritizing the recommendations in the Team's IPM Statement and developing next steps for the workgroup, the steering committee, and other team members. The objective is to make pesticide safety education an integral part of IPM programs, guidelines, grants, and educational outreach that are intended to minimize pesticide risks to human health and the environment. This would make IPM a key influencer in advancing pesticide safety education as an essential element of the chemical component of IPM.

2019 PSEP Workgroup

Mimi Rose, Ohio PSEP coordinator, has kindly agreed to chair the 2019 PSEP Workgroup, which will review proposals submitted in response to the 2019 RFP planned for this summer.

The next team meeting is February 25th. Have a nice weekend, everyone! Carol

CropLife IRON PRODUCT SHOWCASE

December 3, 2018

In the market for new iron or related equipment? Suppliers provide updates on the latest in their lines of products and services.

RBR Enterprise

2019 RBR Venturi w/RA-885 Pneumatic Spreader® C

For 2019, the Venturi 380 is available with the all new RA-885 pneumatic granular applicator. The RA-885 features a 304SS mesh-chain delivery system, rear-mounted 70' booms, application of up to 1,200lbs per acre, and an industry leading 350 cu.ft. capacity. Capable of delivering up to 3 products, bin dividers can adjust to a 50/50 or 60/40 split between the two main bins, and micro hopper can stand alone or used to supplement the second bin.

STATE OF AG RETAIL DISTRIBUTION: Insights from Industry Experts

JOIN US FOR THIS FREE WEBINAR
DECEMBER 12, 2018 | 1 P.M. CT (2 P.M. ET)
Approved for .5 CCA CEU in Professional Development

A perfect storm of changes is impacting the ag retail distribution chain. From a declining commodities market and consolidation at every level, to trade tariffs and e-commerce business models, a slew of factors are radically altering every aspect of the supply channel. Staying on top of this ever-changing market landscape can be daunting.

That's why the editors of *CropLife* magazine are presenting the exclusive webinar "The State of Ag Retail Distribution: Insights from Industry Experts" on December 12.

Greetings- Looks like lots of great things continue to happen. Two notes for updates:

- My affiliation on the National Pesticide Safety Education Month and the Consumer Work Group should be the University of Delaware Pesticide Safety Education Program as those are done as part of my role as the coordinator.
- Ben Coverdale is no longer working with pesticide certification at the Delaware Department of Agriculture.

Thanks,
Kerry

Subject: Announcement of 2018 Award Winners

2018 Priority Resource Development Awards to PSEPs
For Posting on the PSEP-IMI Password-Protected Website

Congratulations to Darrell Hensley, University of Tennessee Pesticide Safety Education Program Coordinator, for receiving two grants as a result of the National Stakeholder Team's 2018 Request for Proposals (RFP).

One objective of this RFP was to create additional priority educational resources to enhance the competency of pesticide applicators and thereby the protection of human health and the environment. A second key objective was to strengthen the EPA-recognized Land-Grant University Pesticide Safety Education Programs by making these resources accessible via the PSEP-IMI website.

The projects awarded were:

Treated Seed (\$20K)

Protecting sensitive areas, including water, pollinators, and wildlife, when using treated seed.

Audience: Private applicators, farmers

Language: English

Format: 1 to 2 hour, fully scripted PowerPoint module with detailed notes. Reading bag tags for precautions; precautions when planting; precautions when handling treated seed and seed containers; how to recycle containers; disposing of unused treated seed and used seed containers (include b-roll video/images), etc.

For in-person training or proctored/online/distance education.

Focus on Safety (\$20K)

Deeper discussion than the core manual, and covering category-specific information for 1) structural, 2) turf, and 3) ag. Understanding and preventing cross contamination when pesticides are applied (indoors or outdoors), including potential impacts on applicators, others and the environment. Include key decisions that must be made during various steps, e.g. purchase, transport, application, decontamination, disposal, and storage (of pesticides/PPE/work clothes); and what/how improper actions lead to exposure of the applicator, others, and the environment.

Provocative questions for state-specific and audience-specific customizations by PSEPs.

Audience: Certified applicators; easily extractable for 1 hour education of homeowners

Language: English

Format: Two-hour, fully scripted PowerPoint module (in-door and out-door versions) with detailed notes.

For in-person training or proctored/online/distance education.

These free resources can be used in their original form, extracted, or customized and copyrighted (if desired) by any PSEP for use **within** their state (by the PSEP and their not-for-profit partners in Extension and the State Regulatory Agencies). Reasonable fees may be charged by any PSEP to recoup the costs of customization, production, distribution, and/or use of these resources (original or customized) **within** their state.

Our appreciation goes to the National Stakeholder Team's 2018 PSEP workgroup, which reviewed the proposals, provided suggestions and selected the award recipients. Workgroup members were:

Natalia Clifton – Massachusetts PSEP (chair), representing the Northeast

Mimi Rose – Ohio PSEP, representing the Midwest

Mickey Taylor – Georgia PSEP, representing the South

Thia Walker – Colorado PSEP, representing the West

Again, congratulations to Darrell for receiving two awards!

Sincerely,

Jim Burnette Carol Somody
Co-Leads, National Stakeholder Team for PSEP Funding

The 2018 awards were provided by Syngenta. The 2018 PSEP Resource Needs List and 2018 Request for Proposals are posted on the National Stakeholder Team [website \(nst-psep.net\)](http://nst-psep.net) in the PSEP-IMI section.
